- 3. Carrier Management
 - 3.1 Carrier Table
 - 3.2 Adding a New Carrier
- 4. Receiver Management
 - 4.1 Receiver Table
 - 4.2 Adding a New Receiver
- 5. Best Practices

1. Introduction

This guide is designed for administrators of the Sales CRM system. As an administrator, you have access to powerful tools for managing users, monitoring activity, and ensuring the smooth operation of your sales team.

1.1 Admin Capabilities

- **User Management** - Create, edit, and manage user accounts
- **Activity Monitoring** - Track user status changes and online activity
- **Time Tracking** - Monitor active and inactive time for each user
- **Sales Oversight** - View sales logs and performance for all users
- **Call Monitoring** - Access call logs with detailed filtering options
- **Location Tracking** - View user location information for security

1.2 Accessing Admin Features

Admin features are accessible from the main navigation bar. Click on 'Admin' dropdown to access User Management and other administrative functions. Only users with the 'admin' role can access these features.

2. User Management

The User Management page is the central hub for managing all system users. Here you can view all users, their roles, status, and perform various administrative actions.

2.1 User Management Table

The main table displays all users in the system with the following columns:

- **User** - User's avatar and full name
- **Online Status** - Shows if user is Online or Offline
- **Last Seen** - Date and time of last activity
- **Role** - User's role (Admin, Supervisor, Agent, Processor, Verification)
- **Supervisor** - Assigned supervisor for agents
- **Account Status** - Active or Inactive account status
- **Created** - Account creation date
- **Actions** - Available administrative actions

User Management

Figure 2.1: User Management Table showing all system users

Use the **Configure columns** button to customize which columns are visible. Click **Add New User** to create a new user account.

2.2 User Actions

Each user row has action buttons in the Actions column:

- **Edit** - Modify user details, role, or supervisor assignment
- **Force Logout** - Immediately log out the user from all sessions
- **Deactivate/Activate** - Toggle user account status

- **Disable/Enable Twilio** - Control user's access to calling features

Note: Deactivated users (shown with 'Inactive' status in orange) cannot log into the system until their account is reactivated.

2.3 User Details Modal

Click on any user's name to open the User Details Modal. This modal provides comprehensive information about the user organized into five tabs: Activities, Time Logs, Sales Logs, Call Logs, and User Info.

At the top of the modal, you'll see the user's name, email, role, and current online status. A date range picker allows you to filter data across all tabs by specific date ranges.

2.4 Activities Tab

The Activities tab shows a chronological log of the user's status changes:

- Status transitions (online to away, away to online, etc.)
- Timestamp for each status change
- IP address from which the change occurred

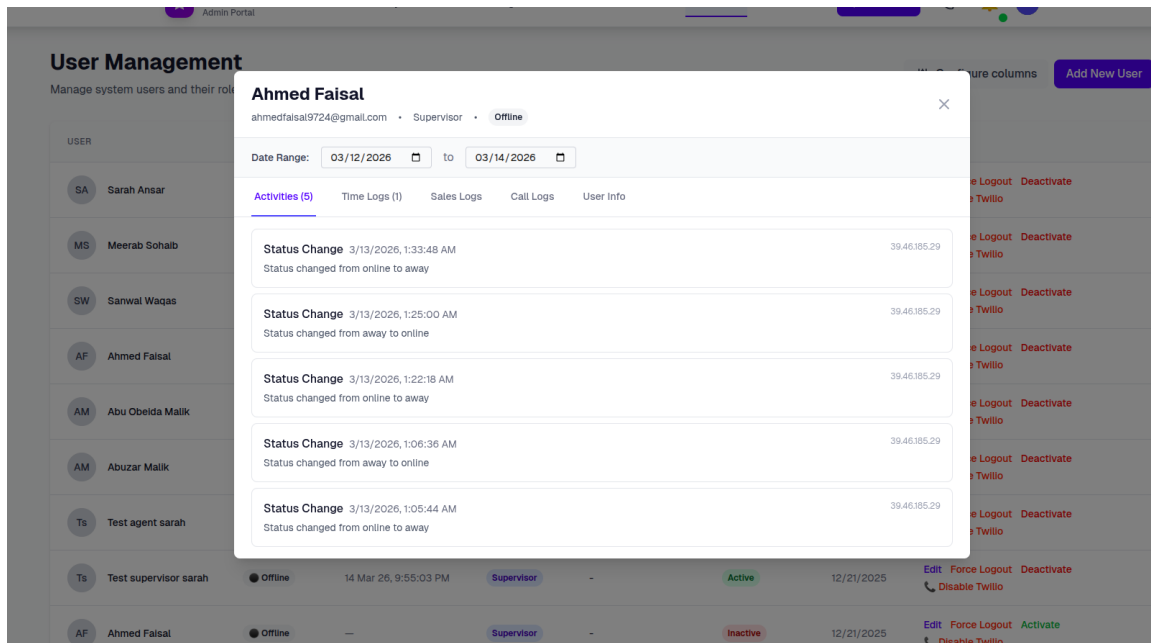

Figure 2.2: Activities Tab showing user status change history

This information helps monitor user engagement and identify any unusual activity patterns.

2.5 Time Logs Tab

The Time Logs tab provides detailed time tracking for each user:

- **Date** - The specific day being tracked
- **Active Time** - Total time the user was actively working (shown in green)
- **Inactive Time** - Time the user was idle or away
- **Login Count** - Number of times the user logged in that day
- **First/Last Active** - First and last activity timestamps

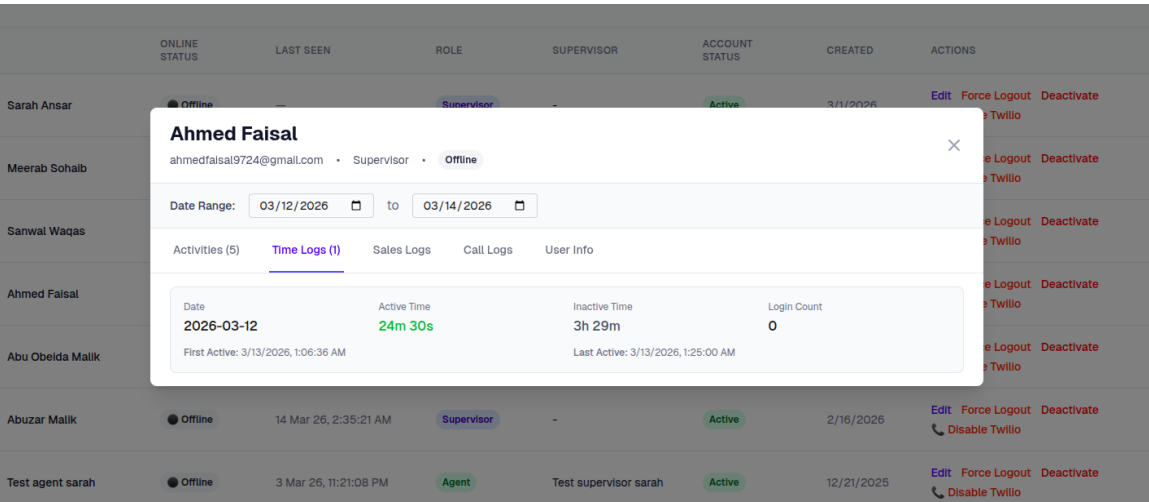

Figure 2.3: Time Logs Tab showing active and inactive time tracking

Use this tab to monitor productivity and ensure users are meeting their work hour requirements.

2.6 Sales Logs Tab

The Sales Logs tab displays all sales activities for the selected user:

- **Sale Status** - Current status (No Response, Voicemail, Sale Done, etc.)
- **Status Badge** - Color-coded status indicator
- **Timestamp** - Date and time of the sale activity
- **Customer Name** - Name of the customer
- **Sale ID** - Reference number for the sale

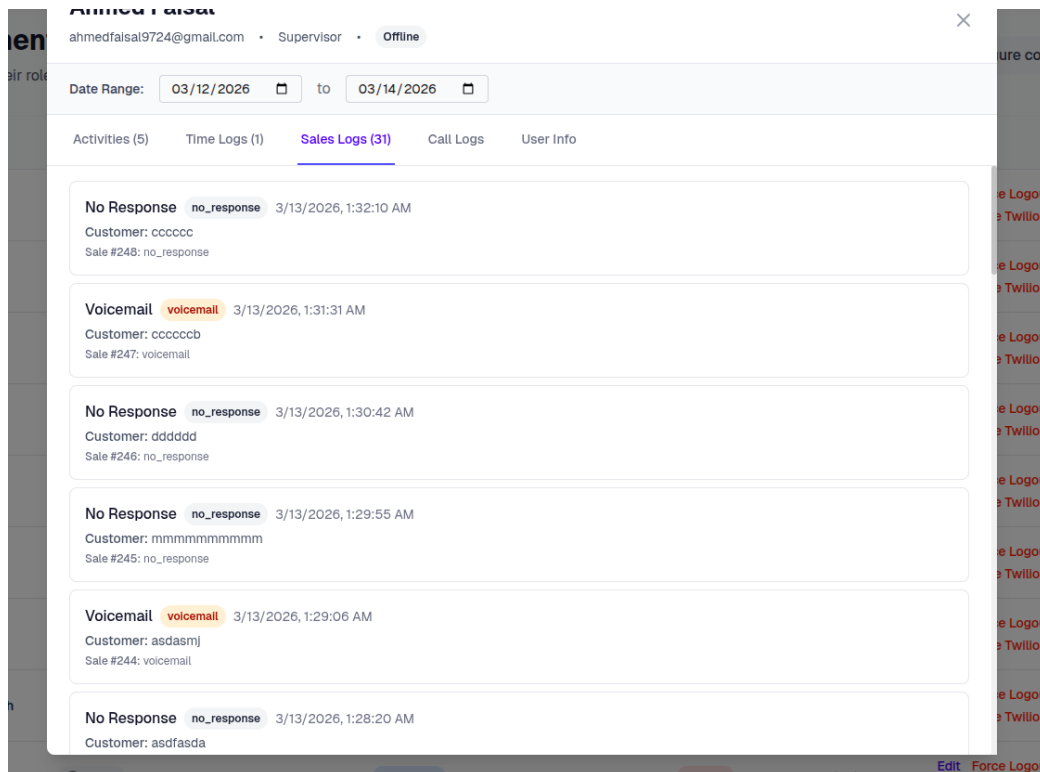

Figure 2.4: Sales Logs Tab showing user sales activity history

The number in parentheses next to the tab name indicates the total count of sales logs for the selected date range.

2.7 Call Logs Tab

The Call Logs tab provides a comprehensive view of all calls made by the user with powerful filtering options:

Filter Options:

- **Select State** - Filter by US state
- **City** - Filter by city name
- **Phone** - Search by phone number
- **Status** - Filter by call status (completed, no-answer, busy, etc.)

- **Purpose** - Filter by call purpose
- **Source** - Filter by call source
- **Notes** - Search within call notes

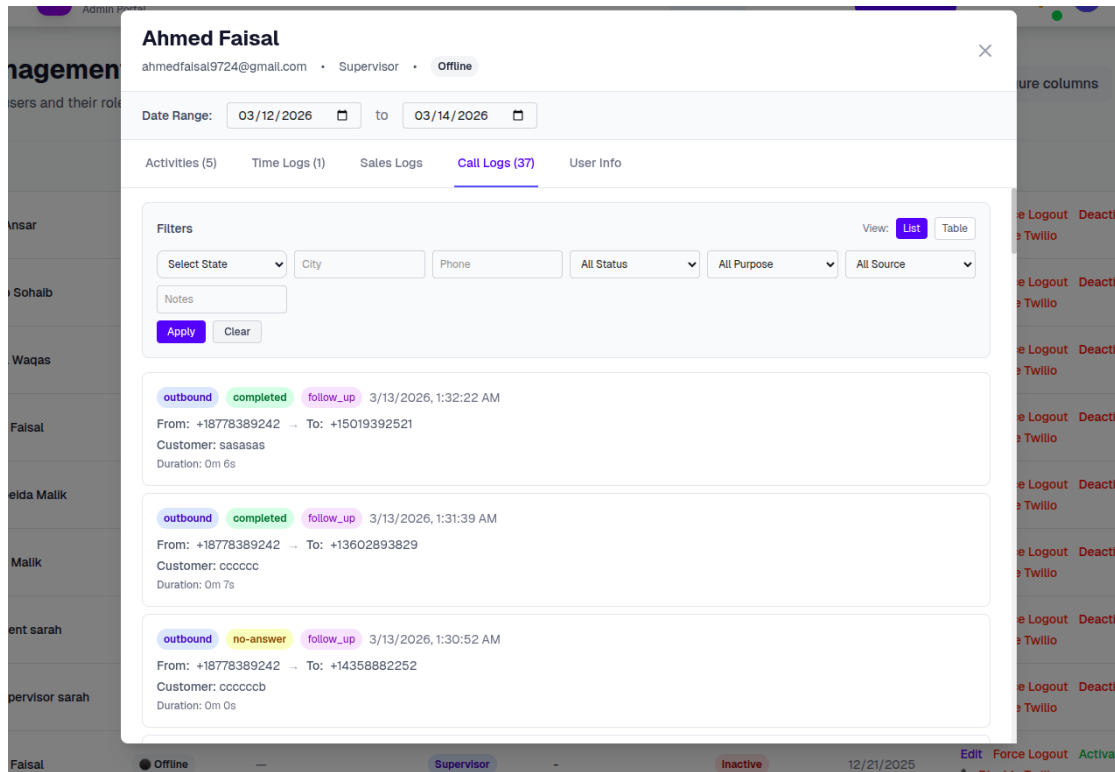

Figure 2.5: Call Logs Tab with filtering options and call history

Call Log Details:

- **Direction Badge** - Outbound or Inbound call indicator
- **Status Badge** - Call outcome (completed, no-answer)
- **Purpose Badge** - Call purpose (follow_up, new lead, etc.)
- **From/To Numbers** - Source and destination phone numbers
- **Customer Name** - Associated customer
- **Duration** - Length of the call

Toggle between **List** and **Table** view using the buttons in the top right. Click **Apply** to apply filters or **Clear** to reset all filters.

2.8 User Info Tab

The User Info tab displays comprehensive account and location information:

Account Information:

- **Last Login** - Most recent login timestamp
- **Last Logout** - Most recent logout timestamp
- **Last Seen** - Last activity timestamp
- **Account Status** - Active or Inactive
- **Current Status** - Online, Offline, or Away
- **Created** - Account creation date and time
- **Location Permission** - Granted or Denied

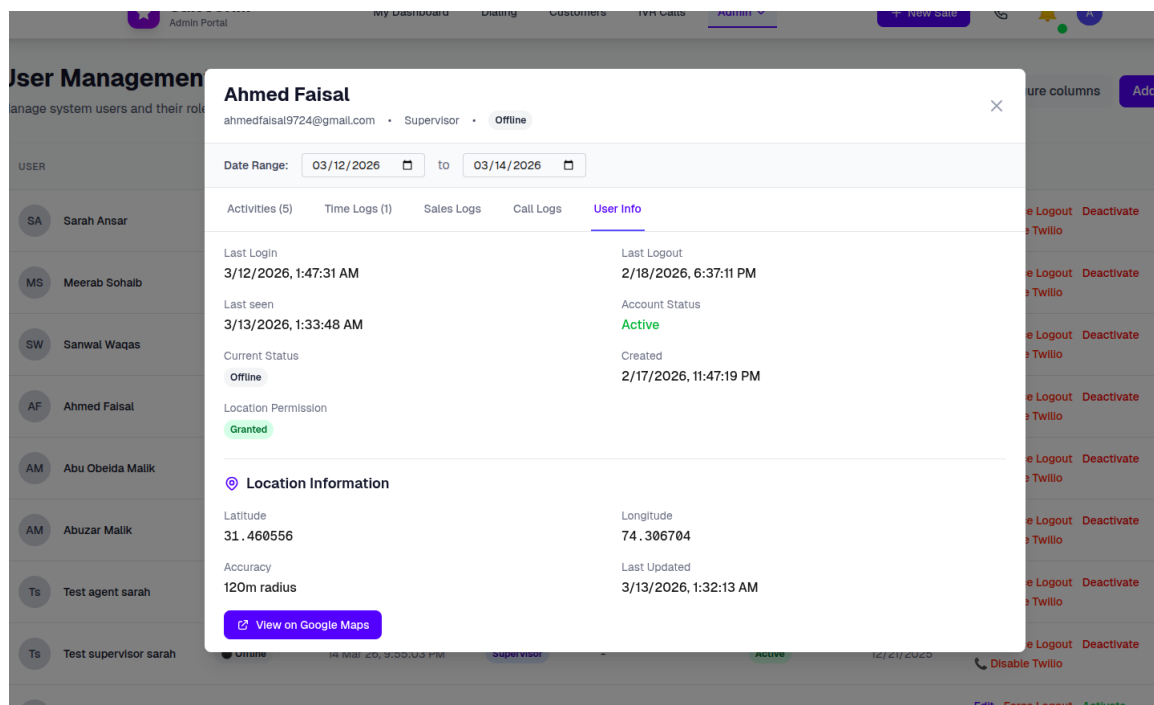

Figure 2.6: User Info Tab showing account and location details

Location Information:

- **Latitude/Longitude** - GPS coordinates of last known location
- **Accuracy** - Location accuracy radius in meters
- **Last Updated** - When location was last updated
- **View on Google Maps** - Button to open location in Google Maps

Security Note: Location tracking helps ensure users are working from authorized locations and provides an additional layer of security for your organization.

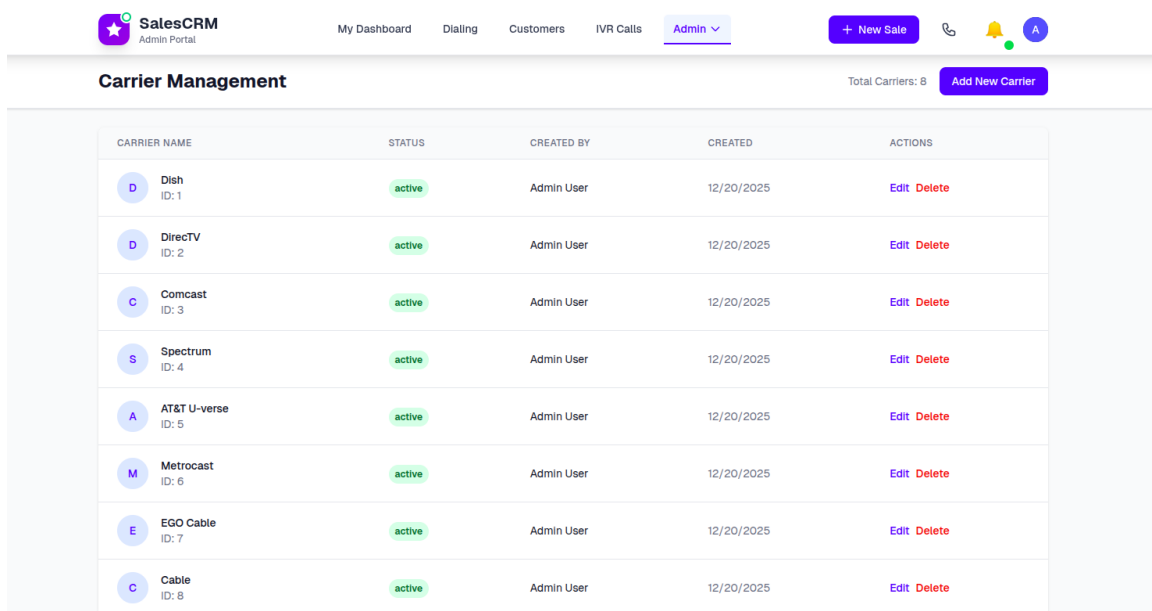

3. Carrier Management

Carrier Management allows administrators to manage the list of TV/Internet service providers that are available in the system. Carriers are used to categorize sales and track which providers your team is selling.

3.1 Carrier Table

The Carrier Management table displays all carriers in the system:

- **Carrier Name** - Name of the carrier with its ID
- **Status** - Active or Inactive status badge
- **Created By** - User who created the carrier
- **Created** - Date when the carrier was added
- **Actions** - Edit or Delete options

The screenshot shows the SalesCRM Admin Portal interface. The top navigation bar includes the SalesCRM logo, a user profile icon, and several menu items: My Dashboard, Dialing, Customers, IVR Calls, and Admin (selected). There are also buttons for '+ New Sale', a phone icon, a bell icon, and a user icon. Below the navigation bar, the 'Carrier Management' section is displayed, showing a table of carriers. The table has columns for CARRIER NAME, STATUS, CREATED BY, CREATED, and ACTIONS. There are 8 carriers listed, all with a status of 'active' and created by 'Admin User' on '12/20/2025'. The 'ACTIONS' column for each carrier contains 'Edit' and 'Delete' links. To the right of the table, it says 'Total Carriers: 8' and there is an 'Add New Carrier' button.

CARRIER NAME	STATUS	CREATED BY	CREATED	ACTIONS
D Dish ID: 1	active	Admin User	12/20/2025	Edit Delete
D DirectTV ID: 2	active	Admin User	12/20/2025	Edit Delete
C Comcast ID: 3	active	Admin User	12/20/2025	Edit Delete
S Spectrum ID: 4	active	Admin User	12/20/2025	Edit Delete
A AT&T U-verse ID: 5	active	Admin User	12/20/2025	Edit Delete
M Metrocast ID: 6	active	Admin User	12/20/2025	Edit Delete
E EGO Cable ID: 7	active	Admin User	12/20/2025	Edit Delete
C Cable ID: 8	active	Admin User	12/20/2025	Edit Delete

Figure 3.1: Carrier Management table showing all carriers

The **Total Carriers** count is displayed in the top right corner. Common carriers include Dish, DirecTV, Comcast, Spectrum, AT&T; U-verse, Metrocast, and others.

3.2 Adding a New Carrier

To add a new carrier, click the **Add New Carrier** button in the top right. A modal will appear with the following fields:

- **Carrier Name** - Enter the name of the carrier

- **Status** - Select Active or Inactive from the dropdown

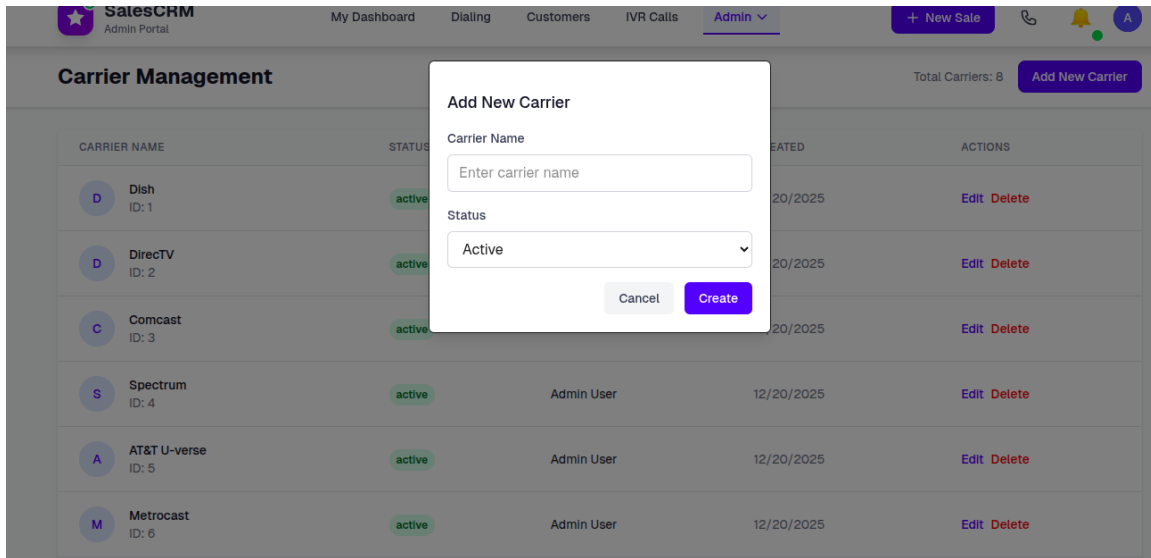

Figure 3.2: Add New Carrier modal

Click **Create** to add the carrier or **Cancel** to close the modal. You can edit or delete existing carriers using the action buttons in each row.

4. Receiver Management

Receiver Management allows administrators to manage the equipment/receiver models associated with each carrier. Receivers are the devices that customers use to access services (e.g., Hopper, Joey, Wally for Dish).

4.1 Receiver Table

The Receiver Management table displays all receiver models in the system:

- **Receiver Name** - Name of the receiver model with its ID
- **Carrier** - The carrier this receiver belongs to (e.g., Dish)
- **Status** - Active or Inactive status badge
- **Created By** - User who added the receiver
- **Created** - Date when the receiver was added
- **Actions** - Edit or Delete options

Receiver Management					Total Receivers: 20	Add New Receiver
RECEIVER NAME	CARRIER	STATUS	CREATED BY	CREATED	ACTIONS	
 3900 ID: 11	Dish Carrier ID: 1	active	Admin User	12/20/2025	Edit Delete	
 Wally ID: 20	Dish Carrier ID: 1	active	Admin User	12/20/2025	Edit Delete	
 Wireless Joey ID: 19	Dish Carrier ID: 1	active	Admin User	12/20/2025	Edit Delete	
 Joey 2.0 ID: 18	Dish Carrier ID: 1	active	Admin User	12/20/2025	Edit Delete	
 Joey ID: 17	Dish Carrier ID: 1	active	Admin User	12/20/2025	Edit Delete	
 Hopper-3 ID: 16	Dish Carrier ID: 1	active	Admin User	12/20/2025	Edit Delete	
 Hopper with Sling ID: 15	Dish Carrier ID: 1	active	Admin User	12/20/2025	Edit Delete	
 Hopper ID: 14	Dish Carrier ID: 1	active	Admin User	12/20/2025	Edit Delete	
 DP 301 ID: 13	Dish Carrier ID: 1	active	Admin User	12/20/2025	Edit Delete	
 2700 ID: 12	Dish Carrier ID: 1	active	Admin User	12/20/2025	Edit Delete	

Figure 4.1: Receiver Management table showing all receivers

The **Total Receivers** count is displayed in the top right. Common receivers include Hopper, Hopper with Sling, Hopper-3, Joey, Joey 2.0, Wireless Joey, Wally, and various model numbers like 3900, 2700, DP 301.

4.2 Adding a New Receiver

To add a new receiver, click the **Add New Receiver** button. A modal will appear with the following fields:

- **Receiver Name** - Enter the name/model of the receiver
- **Carrier** - Select the carrier from the dropdown
- **Status** - Select Active or Inactive

The image shows a web application interface for receiver management. A modal titled "Add New Receiver" is open in the center. The modal contains three input fields: "Receiver Name" with a placeholder "Enter receiver name", "Carrier" with a dropdown menu showing "Select a Carrier", and "Status" with a dropdown menu showing "Active". At the bottom of the modal are two buttons: "Cancel" and "Create". In the background, a table is visible with columns for "CARRIER", "CREATED", and "ACTIONS". The table lists several receivers, each with a "Dish" icon, a "Carrier ID", a status (e.g., "active"), a user (e.g., "Admin User"), a creation date (e.g., "12/20/2025"), and "Edit" and "Delete" links. A "Total Receivers: 20" label and an "Add New Receiver" button are also visible in the top right of the background interface.

Figure 4.2: Add New Receiver modal

Click **Create** to add the receiver or **Cancel** to close the modal. Receivers must be associated with a carrier to properly categorize equipment.

5. Best Practices

5.1 User Account Management

- Regularly review user accounts and deactivate unused accounts
- Assign appropriate roles based on job responsibilities
- Ensure agents are assigned to the correct supervisor
- Use Force Logout when immediate session termination is needed

5.2 Monitoring and Compliance

- Review Time Logs weekly to monitor productivity
- Check Activities tab for unusual login patterns
- Use Call Logs filters to investigate specific issues
- Verify location information for remote workers

5.3 Security Recommendations

- Disable Twilio access for users who don't need calling features
- Deactivate accounts immediately when employees leave
- Monitor IP addresses in Activities for unauthorized access
- Regularly verify location permissions are granted
